Bryan Bishop and Partners are delighted to bring to the market this well-presented three-bedroom detached family home set back on the edge of Welwyn Village, measuring just shy of 2000 square feet and sits on the largest plot on the road at over half an acre. It boasts an inviting curb appeal and features a driveway with space for up to four cars, plus a further two cars in the double garage.

As you step inside, you will find the ground floor offers a range of versatile spaces, including a large dining room featuring sliding doors to the rear of the property flooding the room with an abundance of natural light, a downstairs W.C, the main living room which also benefits from sliding doors to the rear of the property. Following through from the dining room you find yourself in the kitchen offering plenty of base and eye level units and benefiting from a range of integrated appliances. Finally on the ground floor there is the second living room which is a part of the extension, which was done around 20 years ago with sliding doors to the sunny rear patio. There is also internal access to the double garage via a boot room with a separate front door.

Ascending to the first floor which hosts three double bedrooms, the master bedroom impresses with its spacious feel, floor to ceiling fitted wardrobe units, good-sized ensuite, and picturesque field views from the rear of the property, the second bedroom offers a large space whilst also benefitting from fitted wardrobe units and stunning views to the rear. Completing the upper level is a three-piece bathroom suite, and a well-proportioned third double bedroom.

Situated on a stunning plot measuring well over half an acre (0.57), with its large sunny south-east orientated rear garden, which has been thoughtfully tiered, offering a dynamic and visually appealing space. A generously sized patio area provides the perfect space for outdoor gatherings and al fresco dining. The property also benefits from a new boiler installed around a year ago, which was fitted by British Gas, and the infrastructure for an electric car charger.
