Local Information and Property Information

Monarch Rise is situated in the Chrysalis Park area of Stevenage which is close to Box Wood (AS PICTURED) which offers excellent country walks towards Walkern and Aston

Village.

Heating System

All radiators throughout the house are fitted with Tado smart thermostats,

This setup enhances energy efficiency and can help reduce gas usage by heating only selected rooms as needed.

Solar Panels -

System Overview:

This property has a 3.99 kWp solar photovoltaic (PV) system, designed and installed by Halo Energy in July, 2015. The system is designed to significantly reduce electricity costs and potentially generate income through the Feed-in Tariff (FIT) scheme.

Appendix

The sum received for a Feed-in tariff March 2024- March 2025 was £671.95

Current tariff is 19.02 p/kWh

According to the Octopus energy account :

Our estimated annual cost for a family of two.

£889.31 a year for electricity

£795.60 a year for gas

As of May 2025, the understanding is that existing FIT contracts can typically be transferred to new homeowners upon the sale of the property. This means the new buyer should, in principle, be able to continue receiving the FIT payments for the remaining duration of the original FIT agreement.

However, it is absolutely crucial that potential buyers verify this information independently with the relevant authorities, such as Ofgem or the current FIT licensee (energy supplier). FIT scheme rules and transferability guidelines can change over time, and it is the buyer's responsibility to confirm the exact status and conditions of the existing FIT contract.

Security Systems

The property is equipped with two layers of security:

A CCTV system with five external cameras, including one in the garage, all managed via a central server located in the garage.

Floor Plan

Council Tax Details

Band: E

Energy Efficiency Rating			Environmental Impact (CO ₂) Rating		
	Current	Potential		Current	Potential
Very energy efficient - lower running costs			Very environmentally friendly - lower CO ₂ emissions		
(92 plus) A			(B2 plus) A		
(81-91) B			(B1-21) B		
(69-80) C			(B9-20) C		
(55-68) D			(B5-18) D		
(39-54) E			(B0-16) E		
(21-38) F			(21-38) F		
(1-20) G			(1-20) G		
Not energy efficient - higher running costs			Not environmentally friendly - higher CO ₂ emissions
