

# Energy performance certificate (EPC)

|                                                  |                           |                                                     |
|--------------------------------------------------|---------------------------|-----------------------------------------------------|
| Alma Cottage<br>Llechryd<br>CARDIGAN<br>SA43 2QJ | Energy rating<br><b>C</b> | Valid until: <b>29 July 2036</b>                    |
|                                                  |                           | Certificate number: <b>0436-9923-0600-0778-4222</b> |

Property type Semi-detached house

Total floor area 139 square metres

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

## Energy rating and score

This property's energy rating is C. It has the potential to be C.

[See how to improve this property's energy efficiency.](#)

The graph shows this property's current and potential energy rating.

**Properties get a rating from A (best) to G (worst) and a score.** The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D  
the average energy score is 60

| Score | Energy rating | Current | Potential |
|-------|---------------|---------|-----------|
| 92+   | <b>A</b>      |         |           |
| 81-91 | <b>B</b>      |         |           |
| 69-80 | <b>C</b>      | 76 C    | 76 C      |
| 55-68 | <b>D</b>      |         |           |
| 39-54 | <b>E</b>      |         |           |
| 21-38 | <b>F</b>      |         |           |
| 1-20  | <b>G</b>      |         |           |

## Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature              | Description                                 | Rating    |
|----------------------|---------------------------------------------|-----------|
| Wall                 | Granite or whin, with internal insulation   | Good      |
| Wall                 | Cavity wall, as built, insulated (assumed)  | Good      |
| Wall                 | Timber frame, as built, insulated (assumed) | Good      |
| Roof                 | Pitched, 350 mm loft insulation             | Very good |
| Roof                 | Pitched, insulated                          | Average   |
| Roof                 | Roof room(s), insulated                     | Good      |
| Window               | Fully double glazed                         | Average   |
| Main heating         | Air source heat pump, underfloor, electric  | Average   |
| Main heating         | Air source heat pump, radiators, electric   | Good      |
| Main heating control | Time and temperature zone control           | Very good |
| Main heating control | Time and temperature zone control           | Very good |
| Hot water            | From main system                            | Average   |
| Lighting             | Good lighting efficiency                    | Good      |
| Floor                | Solid, insulated                            | N/A       |
| Floor                | (another dwelling below)                    | N/A       |
| Air tightness        | (not tested)                                | N/A       |
| Secondary heating    | None                                        | N/A       |

### Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO<sub>2</sub>. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

- Air source heat pump
- Air source heat pump
- Solar photovoltaics

### Primary energy use

The primary energy use for this property per year is 62 kilowatt hours per square metre (kWh/m<sup>2</sup>).

### Additional information

Additional information about this property:

- PVs or wind turbine present on the property (England, Wales or Scotland)  
The assessment does not include any feed-in tariffs that may be applicable to this property.

## Smart meters

This property had a **smart meter for electricity** when it was assessed.

Smart meters help you understand your energy use and how you could save money. They may help you access better energy deals.

[Find out about using your smart meter \(https://www.smartenergygb.org/using-your-smart-meter\)](https://www.smartenergygb.org/using-your-smart-meter)

---

## How this affects your energy bills

An average household would need to spend **£1,778 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £0 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2026** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

---

## Heating this property

Estimated energy needed in this property is:

- 9,556 kWh per year for heating
  - 2,757 kWh per year for hot water
-

## Impact on the environment

This property's environmental impact rating is A. It has the potential to be A.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year.

|                        |                               |
|------------------------|-------------------------------|
| This property produces | 0.8 tonnes of CO <sub>2</sub> |
|------------------------|-------------------------------|

|                                      |                               |
|--------------------------------------|-------------------------------|
| This property's potential production | 0.8 tonnes of CO <sub>2</sub> |
|--------------------------------------|-------------------------------|

You could improve this property's CO<sub>2</sub> emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

## Carbon emissions

|                               |                             |
|-------------------------------|-----------------------------|
| An average household produces | 6 tonnes of CO <sub>2</sub> |
|-------------------------------|-----------------------------|

## Steps you could take to save energy

The assessor did not make any recommendations for this property.

## Advice on making energy saving improvements

[Get detailed recommendations and cost estimates \(www.gov.uk/improve-energy-efficiency\)](http://www.gov.uk/improve-energy-efficiency)

## Who to contact about this certificate

### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

|                 |                                                                          |
|-----------------|--------------------------------------------------------------------------|
| Assessor's name | Eleanor Black                                                            |
| Telephone       | 07463906747                                                              |
