LECHLADE ON THAMES

Lechlade-on-Thames, is a market town at the southern edge of the Cotswolds in Gloucestershire. It is the highest point at which the River Thames is navigable. The town is named after the River Leach that joins the Thames near here and is a popular venue for tourism and river-based activities. There are several pubs, some antique shops, a convenience store, food outlets, a garden centre and a Christmas shop. Near the 15th century Church of England parish church of Saint Lawrence, in the centre of the town, there is a large open space which is now a car park. The main roads through the town are busy, as the town is at the crossroads of the A417 and A361. Where the A361 enters the town from the south it crosses the River Thames on Halfpenny Bridge. Another tributary of the Thames, the River Coln, joins the Thames at the Inglesham Round House.

Directions

From the Market Place, proceed through the lights towards Fairford. The property is then a short distance on the left.
