@robertellisea

On behalf of Futures Housing, we are pleased to offer for sale 5 brand new two double bedroom town houses within a new development of state of the art housing by Peveril Homes and Stagfield Developments.

Currently under construction with anticipated completion of April 2024, these cutting edge properties have the latest in build and energy efficiency technologies with central heating served from air source heat pumps with underfloor heating to the ground floor and radiators to the first.

Solar PV panels to the roof where the owner will benefit not only reduced electricity bills but any surplus energy the PV panels generate will automatically be sold back to the Grid and the customer will see the financial benefit of this.

Situated within an established residential suburb in the highly regarded Nottinghamshire town of West Bridgford, the development is close to local schools and amenities, including the town centre itself and a broad range of shops and facilities with a great choice of bistros, bars and cafes. There are great public transport links to Nottingham city centre.

Each property will be finished internally, ready to move into, with vinyl flooring to the kitchen and wet areas, and carpets in the remaining rooms. There will be two parking spaces per property and an enclosed rear garden finished with patio and lawn.

Ideal for first time buyers and couples, the properties will be sold on a shared ownership scheme, with the buyer purchasing a share of between 35%-75% of the property and paying rent on the remainder\*.

As the development is currently under construction, actual viewings are not possible at this time and therefore to register your interest, and for further information, please contact the selling agents.
