

Various factors can affect coverage, such as being close to large trees or buildings when outdoors, or the thickness of walls if you're inside a building. This means there may be differences between the coverage prediction and your experience.

|   |   |                                |   |
|---|---|--------------------------------|---|
|  |  | Good outdoor and in-home       | + |
|  |  | Good outdoor                   | + |
|  |  | Good outdoor and in-home       | + |
|  |  | Good outdoor, variable in-home | + |

If you're struggling to make phone calls indoors, consider using Wi-Fi calling, where your mobile phone uses a broadband connection to make calls and text messages.

**Key**

-  Good outdoor and in-home
-  Good outdoor, variable in-home
-  Good outdoor
-  Variable outdoor
-  Poor to none outdoor

The table shows the predicted broadband services in your area.

| Broadband type | Highest available download speed | Highest available upload speed | Availability  |
|----------------|----------------------------------|--------------------------------|---|
| Standard       | 9 Mbps                           | 0.9 Mbps                       |  |
| Superfast      | 64 Mbps                          | 20 Mbps                        |  |
| Ultrafast      | --                               | --                             |  |

**Networks in your area - [Openreach](#)**

Click on a network's name to be directed to a website where you can find out about service availability and how to request a service from them or one of their partners.
